2025

The 11th International Festival of Paintings for Pediatric Patients (IFPPP)

President of the Health and Art (HEART) Group:
Nima Rezaei

Chairs of the Festival:
Leonardo Oliveira Reis
Tommaso Dorigo

**In the Name of the Painter of the Universe,
Looking Around in Every Corner, His Paintings are Apparent;
and the Deepest Gratitude to Him for Entrusting Us Trivial Role
in His Enormous Painting**

The world is full of flamboyant paintings created by an omnipotent painter. The deeper we look, the more we realize how inferior we are. To better perceive his colorful world, through investigation into its beauty is mandated. Meanwhile, some unpleasant and unexplainable incidents occur in this world. Although, there is no definite answer for them, they might bolden the beauties of this world and encourage us to have a more comprehensive look at the paintings or to fight unpleasant events and not surrender. Fortunately, there are some individuals that never give up, trying to tackle defects and to make the world a better place. Being with ill children during these years highlighted the importance of mental health and made us realize that both mental and physical health matter. It has become clear to us that when the sick child and the family remain hopeful, do not surrender to illness, and believe in regaining health, the course of the disease is positively affected.

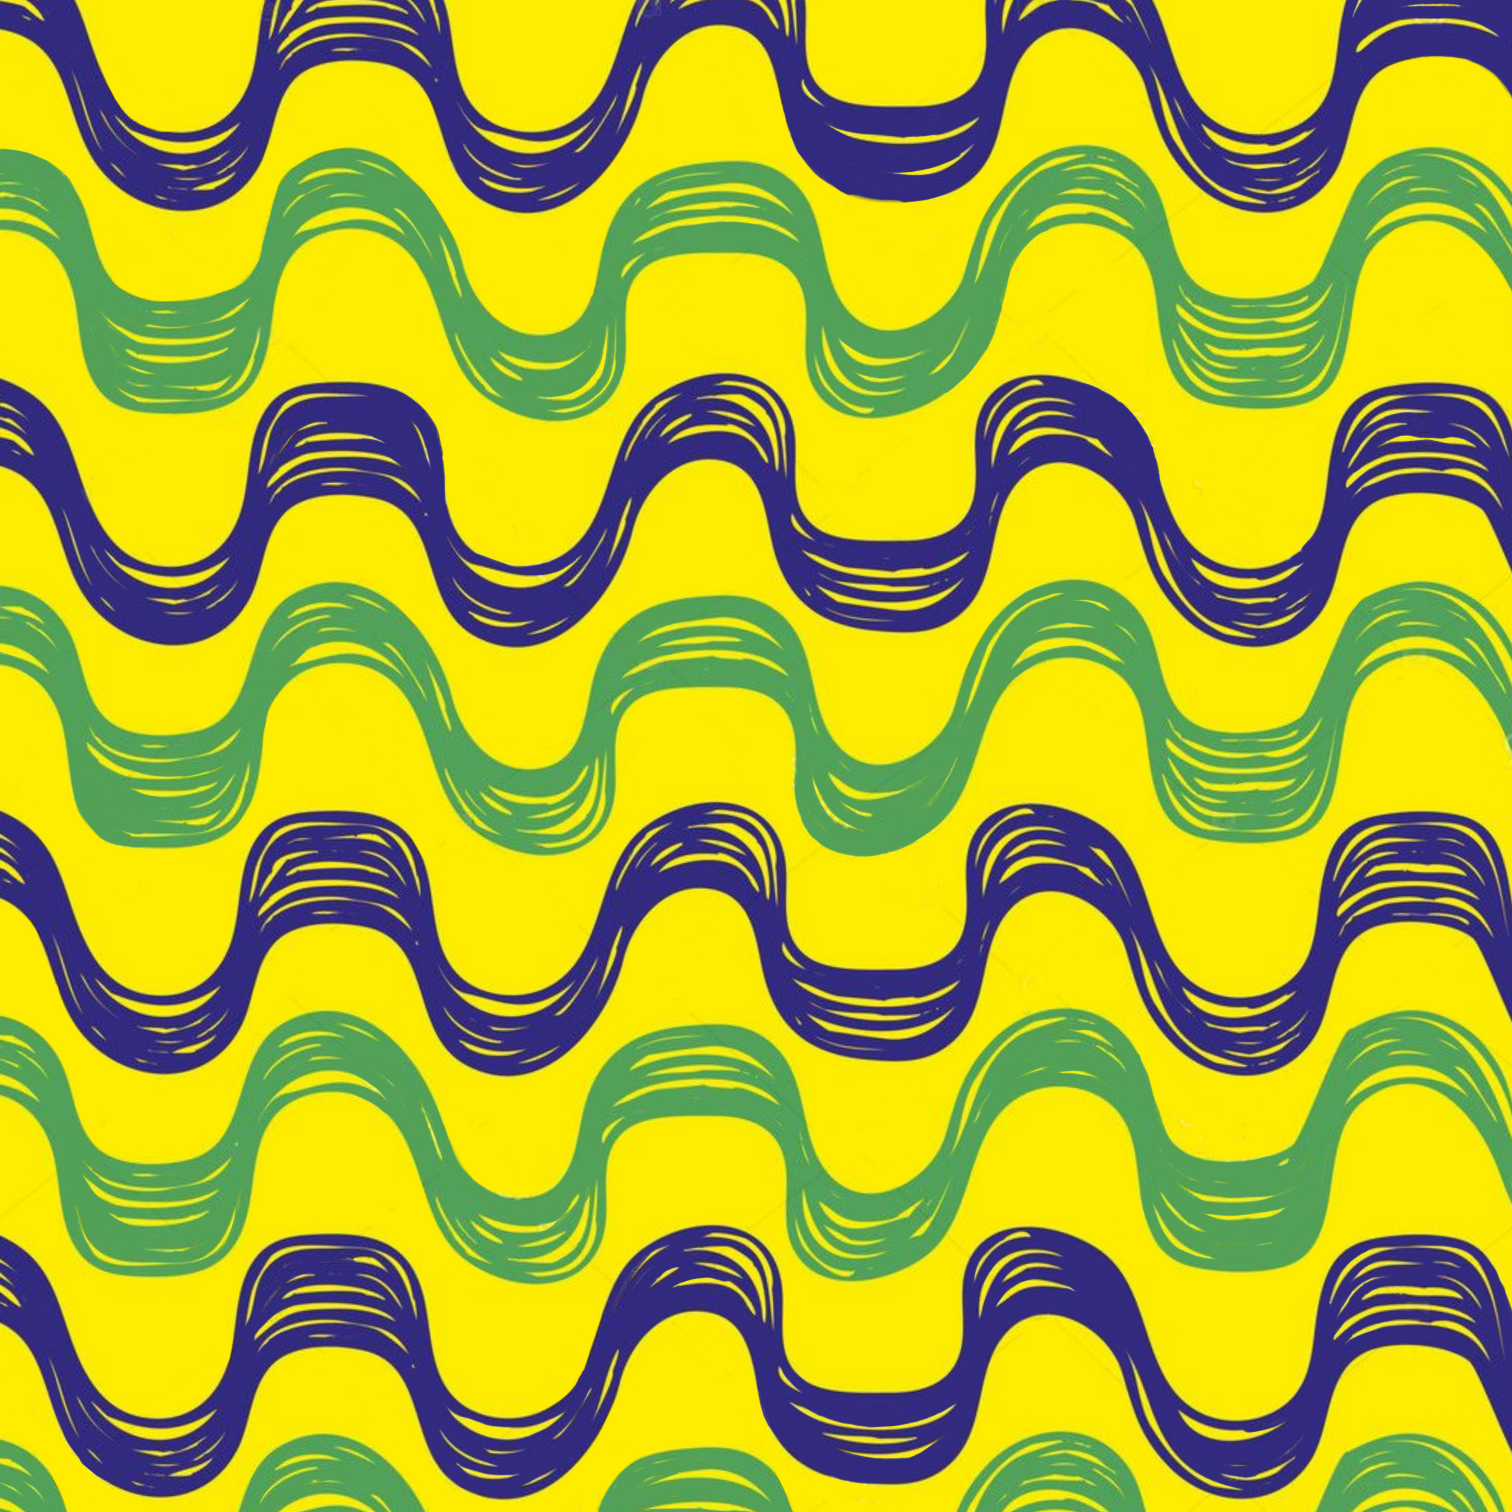

The «Health and Art» (HEART) is international group, which all members are volunteers diming to help sick people and make them blissful and hopeful by being present in health care centers. The goal of HEART group is to have the collaboration of physicians and artists in order to help sick children gain strength, hope and happiness as the three essentials to a favorable course of treatment. Artists can help doctors in boosting hope, happiness, and love in children and their family and heartening them.

The eleventh International Festival of Paintings for Pediatric Patients (IFPPP) has proudly the chance of a great event. Receiving more than 700 artworks from 20 countries of five continents, being supported by about 60 societies/centers as well as professors in medicine and art from different countries as well as about 40 exhibitions of selected works simultaneously in different cities world wide , all confer to its influence on people worldwide. It implies that when a mass movement of lover birds occurs in the sky, those living on ground who are not in cages are willing to jump and join the flying birds And the painter made the sky universe as an opportunity for birds to create paintings in it. The beauty of the flight of these lover birds is heartwarming, the more birds the merrier and the higher the better. The collection is 250 selected paintings of children with general theme of Health in their point of view. The selection was made by the international reviewing and jury committees. Several thoughts are behind these artworks that might not be easily perceived, while the presence of simple verbal statements in some artworks is very thought provoking ... We hope that reviewing these artworks made by these junior artists, better clarify the path we are paving, while there are still at the beginning steps and long road needs to be paved to bring smile on a beating heart.

And the last word, again in his name, as without his love, the paintings are meaningless.

Nima Rezaei

A cartoon illustration on a textured grey background. In the center, a woman with long black hair, wearing a yellow t-shirt and blue jeans, is being held from behind by a large, white, skeletal figure. The skeletal figure has a human-like face with a wide, toothy grin and is holding the woman's arms and torso. Above them are four circular icons, each with red liquid dripping down from its base. From left to right: a clock face showing approximately 10:10; a silhouette of a family (two adults and a child) holding hands; a circle containing a swastika, a yin-yang symbol, and a six-pointed star; and a large dollar sign (\$).
